Todd,

Attached is the response from Joe, Gillies, Jr., Director , Three Affiliated Tribes Environmental Division. Site B still appears to be the preferred site.

Dan:
After review of Slawson's proposed site list, proposed sites designated B and D are agreeable to us. If you have any further concerns feel free to contact me at 701-627-4569.

Joe,

Attached are some proposed sites for the salt water disposal well. Please review and let me know if one of these will work for you guys. Todd Slawson is willing to work with us to find a site that is agreeable to all of us.

Todd,

Site B appears to be the preferred site. Attached is Steve Ike's response.

Hi Kayla:

I have reviewed the four potential SWD well sites included in the 12/20/10 e-mail from Todd Slawson. Any of the sites within the white areas should be OK, however, the greater the distance from the aquifers the better. All of the blue shaded areas (aquifers) should be protected. Of the four sites noted, "B" would appear to be the preferred site. Then, "A", "D", and "C" would be suggested order of preference.

Please let me know if you have any questions.

Steve

Dan,

I have listed four possible disposal well sites on the aquifer map in no particular order. You mentioned that we need to be 1-2 miles from the aquifer but I do not know if that is the dark blue or the lighter blue boundary that we need to distance ourselves from.

Please review with Steve Ike and anyone else you feel needs to know and let me know which sites are acceptable and in what preference and which sites are not acceptable at all.

Please respond to all when you do this as I am out of the office for a couple weeks right after Christmas.

Thanks

Todd Slawson

Hello Joe,

It was nice talking with today. Attached is a generic wellbore diagram (WBD) for the (removed from program Fox SWD) drilling/completion and abandonment of a SWD. The depths for a new well will vary slightly, but basically this is it in a nutshell. Our field foreman in New Town is Kyle Waliezer, 701.421.0762. I will ask Kyle to get with you for a field tour of our sites when he returns from his hiatus.

We look forward working with you on this project. If you have any questions, please feel free to contact me.

Hello Dan,

I am in receipt of the array of emails concerning the SWD proposed site that you sent to Todd. I am the person permitting the well. Unfortunately, we probably will not be able to use Site B, but feel Site A or D would work. I have spoken with Joe, and he is on board to make A his second choice. I have tried to reach Steve today, but missed him. Hopefully everyone will be ok with either A or D as we do not know how this will play out with the surface owner. I am just trying to keep everyone in the loop. I would like to start the permit process next week, assuming I can get a favorable nod from the surface owner. If anyone has any questions, please contact me. Thanks.

Subject: Site D

Dan,

I just emailed you a snip from Google Earth showing the location we are down to for a SWD. It is Site D. The preference back from your group was B, A, D and then C. I think one person had the order as B, D, A and then C.

Site B was the spot around Township Commissioner Adrian Balstad's home but that is not going to work as it is ultimately too small and he is opposed to the truck traffic going by his home.

Site A has land owner issues and also safety concerns with the bend in the road and the approach off the road. Mr. Lee's land is the SW/4 of section 21. We would need to have the approach well away from the ends of the big curve there and we think that will be too dangerous. We even looked at the island of land formed inside the road curve but there are gas pipelines there and it is too small per the land owner.

Site D is the next site and it is ideal as it is fairly centrally located and the landowner is amenable to having it. It needs to be a little more east towards the middle of the section to get away from the three homes to the west side of the section.

So we are proceeding with Site D at this time. I think Don Smith has probably already relayed this to your group.

Please advise if there are further concerns with this site.

Thanks

R. Todd Slawson
